PROFESSIONAL SUMMARY

Results-driven Full-Stack Java Developer with 2+ years of experience designing, developing, and deploying scalable web applications using Java, Spring Boot, and JavaScript. Proficient in RESTful API development, SQL database optimization (PostgreSQL, MySQL), and responsive frontend engineering. Reduced query response times by 40%, delivered 100% of client deadlines, and integrated AI/LLM technologies into production systems. Strong communicator who translates business requirements into clean, maintainable code within Agile teams.

WORK EXPERIENCE

Associate Developer

September 2024 – Present

PetroIT Software Solutions

Gurugram, India

- Spearheaded full-stack development of an enterprise platform serving 500+ users, building frontend with HTML, CSS, JavaScript, jQuery and backend with Java, Spring Boot, and PostgreSQL
- Engineered push notification system using Web Push API, increasing user engagement by 35% and enabling real-time alerts for critical business events
- Designed dynamic reporting module with drag-and-drop SQL join builder, empowering non-technical users to generate reports — reduced generation time from hours to under 2 minutes
- Integrated ApexCharts for interactive data visualization (bar, line, pie, area), replacing static CSV exports and improving stakeholder decision-making
- Established role-based access control (RBAC) system managing 5+ user roles with fine-grained permissions, ensuring secure authorization across all modules
- Collaborated with cross-functional teams of 8+ engineers, PMs, and clients to deliver 15+ features on schedule within Agile/Scrum sprints

Software Developer Intern

February 2024 – August 2024

PetroIT Software Solutions

Gurugram, India

- Optimized 20+ SQL queries and deployed indexing strategies, reducing data retrieval time by 40% and cutting API response latency from 1.2s to 0.3s
 - Crafted reusable Java utility modules adopted by 3 team members, reducing code duplication by 25% and accelerating development velocity
- Built 10+ responsive, accessible UI components with UI/UX designers, ensuring pixel-perfect rendering across mobile, tablet, and desktop
- Maintained 95%+ code quality score in SonarQube through daily stand-ups, sprint planning, and bi-weekly code reviews

PROJECTS

TaskFlow AI — AI-Powered Task Management Platform

2024 – Present

Spring Boot, Next.js, TypeScript, PostgreSQL, Redis, Spring AI, OpenAI GPT-4o-mini, WebSocket, JWT

- Constructed full-stack AI task management platform with real-time multi-user collaboration using WebSocket (STOMP protocol)
 - Secured JWT auth with 15-min access tokens, 7-day refresh token rotation, and token blacklisting via Redis for sub-ms validation
- Integrated Spring AI with GPT-4o-mini for intelligent task suggestions, auto-prioritization, and natural language categorization
- Designed Redis caching (5-min TTL) and rate limiting (100 req/min), reducing PostgreSQL read load by 60% under concurrent usage

Platform — Internal Enterprise Application

April 2024 – Present

Java, jQuery, Node.js, PostgreSQL, REST API, ApexCharts, Web Push API

- Built push notification microservice delivering real-time alerts to 500+ concurrent users with 99.5% delivery rate
 - Delivered interactive reporting engine with custom SQL join builder and output rendered in 6+ chart types via ApexCharts
- Configured hierarchical RBAC supporting admin, manager, and viewer roles across 10+ platform modules

Receipt Slayer — AI-Powered Expense Management App

2024 – Present

React Native, Node.js, PostgreSQL, Claude API, OpenAI, OCR

Engineered multi-model pipeline: receipt image → OCR text extraction → LLM categorisation → DB insert, with monthly reporting and anomaly flagging

Integrated Claude API for natural-language financial insights; produced full BRD, pitch deck, and architecture diagrams for the product

EDUCATION

Bachelor of Engineering in Computer Science

August 2020 – July 2024

Chandigarh University

Mohali, India

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, HTML5, CSS3, jQuery

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring AI, Hibernate, Next.js, React, Bootstrap, Maven

Databases: PostgreSQL, MySQL, MongoDB, Redis

Backend & Web: RESTful APIs, MVC Architecture, Microservices, JWT/Session Auth, WebSocket (STOMP), CRUD, JSON/API Integration

AI/LLM: RAG, LLM Integration, Prompt Engineering, AI Chatbot Development, Vector Databases, OpenAI API, Openclaw

Tools & Automation: Git, GitHub/GitLab, IntelliJ IDEA, VS Code, Postman, Vercel, n8n, Webhooks, AI Pipelines
